Lab 7 Excel Preparation Template

Based on Lab 7: Organization Selection and Audit Scope. Use this workbook to prepare the needed information before writing the controlled audit report master.

Student Reminder: This Excel file is only a preparation and organization tool. It is not a replacement for the final Professional IT Audit Report - Increment 1. Use it to collect clean, traceable, and sanitized information for your report.

Item	Student Entry
Course	PEIS002 - Elective IT Audits and Control
Laboratory	Lab 7 - Organization Selection and Audit Scope
Week	7
Group Size	Three students
Audit Subject	Selected capstone system and its use within the partner organization
Required Submission	Professional IT Audit Report - Increment 1
Output of this Excel	Prepared engagement, organization, system, scope, criteria, procedure, and evidence planning records

Step	What to Prepare Today	Where to Encode
1	Confirm partner organization or approved pseudonym, capstone system, report audience, contact, and authorization limits.	02_EngagementBuild
2	Identify the relevant organization unit, stakeholders, and business process supported by the capstone system.	03_OrgProcessProfile
3	Map only roles and user groups connected to the system: owner, users, access approver, admin, support, privacy/security, escalation.	04_ORG_USR_Mapping
4	Freeze the audited build and list modules, data categories, interfaces, environments, and current implementation status.	05_SystemSnapshot
5	Draft audit objectives and scope boundaries. Clearly separate in-scope, out-of-scope, limitations, and assumptions.	06_ObjectivesScope
6	Identify criteria, procedures, and evidence needed for each objective. Do not collect passwords, tokens, or unnecessary personal data.	07_CriteriaEvidence
7	Record assumptions, limitations, cross-review, and AI validation if AI was used.	08_DecisionLog and 09_ReviewAI

Group Roles and Three-Hour Work Plan

Use this sheet to assign member roles, responsibilities, and required cross-checks for Lab 7.

Member	Student Name	Primary Role	Lab 7 Responsibility	Required Cross-Check	Status
Member 1	[Member 1 full name]	Lead Auditor and Report Controller	Controls the master file, engagement decisions, objectives, scope, versioning, and final integration.	Reviews Member 3's system and evidence entries.	In Progress
Member 2	[Member 2 full name]	Organization and Stakeholder Analyst	Documents the system-related organization profile, business process, structure, users, owners, approvals, and escalation.	Reviews Member 1's scope and objective wording.	In Progress
Member 3	[Member 3 full name]	System and Evidence Analyst	Freezes the capstone build, documents modules, data, interfaces, environments, and prepares the evidence/request plan.	Reviews Member 2's organization and user mapping.	In Progress

Engagement and Audited Build Register

Confirm the engagement, organization, capstone system, authorization limits, and exact audited build.

Field	Student Entry	Notes / Guide
Organization name or approved pseudonym	Mandaluyong City Animal Bite Treatment	Use a pseudonym if the partner organization cannot be identified.
Capstone system name	Animal Bite Treatment	Use the exact system name.
Business purpose of the system	Supports intake and triage of	What process or problem does the system support?
Reporting audience	Course instructor/adviser, capstone	Example: instructor, adviser, partner representative, system owner.
Authorized engagement contact	ABTC Officer-in-Charge / Nurse Supervisor (role	Name/role only. Avoid unnecessary personal information.
Authorization limits	Group may review sanitized process	What are you allowed to review? What are you not allowed to do?
Submission restrictions	Sanitized screenshots and	Example: sanitized screenshots only; no production data.
Audited build / version	v0.9 prototype (capstone demo	Example: v0.9 prototype; demo build; dated release.
Release date / evidence cutoff date	[Insert exact evidence-cutoff	Date until which evidence is valid.
Environment	Local/staging demo environment	Example: local demo, staging, test server, deployed prototype.
Repository branch or deployment reference	capstone-demo branch, group private	Do not expose private credentials or secret keys.
Planned but not implemented features	SMS/text dose-reminder notifications,	List features that must not be represented as implemented.

Build ID	Date	Version / Release	Environment	Change or Freeze Note	Recorded By
BLD-01	[Insert date]	v0.9 prototype	Local/staging demo	Initial audited build for Lab 7	[Member 1]
BLD-02					
BLD-03					

Relevant Organization and Business Process Profile

Document only organization details directly connected to the capstone system.

Section	Student Entry	Guide / Example
Sector / organization type	City government health facility - specialized outpatient clinic under the City Health Office	Example: barangay office, library, clinic, small business, school unit.
Relevant unit or department	Animal Bite Treatment Center (ABTC) unit of the Mandaluyong City Health Office	Only the unit connected to the system, not the entire organization.
Main stakeholders	ABTC nurse/medical staff, ABTC Officer-in-Charge, City Health Office IT/admin support, walk-in animal-bite patients	Example: system owner, approver, staff users, customers/students/residents.
Business process supported	Animal-bite/exposure case intake and anti-rabies post-exposure prophylaxis (PEP) management	Example: complaint filing, inventory issuance, library borrowing, patient queueing.
Process trigger	A walk-in patient reports an animal bite or scratch exposure at the ABTC	What starts the process? Example: customer request, incident report, appointment booking.
Major activities	Patient registration, bite/exposure history-taking, exposure-category assessment, vaccine dose	Summarize key steps performed before/during/after system use.
Decision points	Exposure Category I/II/III classification, RIG eligibility decision, vaccine-stock availability check, missed-dose escalation	Example: approval, verification, rejection, escalation, release, update.
System inputs	Patient demographic and bite-incident data, exposure category, vaccine lot/stock data	Data or documents entered into the system.
System outputs	Bite-case record, vaccination dose card/schedule, vaccine inventory status, summary reports	Reports, alerts, forms, receipts, status updates, dashboards.
Affected stakeholders	Bite-case patients, ABTC medical staff, City Health Office management, DOH rabies-surveillance	Who is affected by the process outcome?
Intended business value	Faster and more accurate bite-case intake and dose tracking, fewer missed follow-up doses, and better visibility into vaccine stock levels	What improvement does the system provide?
Excluded organization details	Other City Health Office programs (e.g., maternal care, TB-DOTS), other city government departments, and organizational history unrelated to the ABTC are	What unrelated departments/history are intentionally excluded?

Step No.	Process Step	Responsible Role / ORG ID	System Module / MOD ID	Input	Output	Decision or Control Point
1	Patient walk-in and registration	Nurse/Encoder (ORG-03)	MOD-02	Patient ID, bite/exposure history	Patient bite-case record created	Identity/duplicate-record check
2	Bite exposure assessment and categorization	Attending nurse/physician (ORG-03)	MOD-02	Bite/exposure details	Exposure category (I/II/III)	Category classification decision
3	Vaccine dose scheduling	Nurse (ORG-03)	MOD-04	Exposure category	Dose schedule (Days 0/3/7/14-28)	Regimen approval
4	Vaccine administration and inventory deduction	Nurse (ORG-03)	MOD-04, MOD-05	Dose schedule, stock level	Updated dose record, updated stock balance	Stock-availability check
5	Follow-up / missed-dose monitoring	Nurse / Admin (ORG-03)	MOD-04	Dose history	Reminder / escalation note	Missed-dose escalation
6	Summary reporting to City Health Office / DOH	ABTC Officer-in-Charge (ORG-01)	MOD-03	Aggregated case data	Summary report	Report review and approval

System-Relevant Organization Roles and User Groups

Assign ORG IDs and USR IDs. Include only roles, units, and user groups connected to the audited system.

Guide: ORG records describe roles/units such as sponsor, owner, approver, admin, support, privacy/security, and escalation authority. USR records describe user groups such as staff, admins, customers, students, or managers.

Record ID	Record Type	Role / Unit / User Group	Main Responsibility or Purpose	Decision Right / Action Allowed	Approval Owner	Reports / Escalates To	Related MOD IDs	Related DATA	SoD / Accountability Concern
ORG-01	Organization role/unit	System Owner	Owns process and approves major changes.	Approves system rules and process changes.		ORG-05	MOD-02, MOD-03, MOD-04, MOD-05	All ABTC-IMS data	
ORG-02	Organization role/unit	Access Approver	Approves user access requests.	Can approve, reject, or revoke access.	ORG-01	ORG-01	MOD-01	Staff user accounts	Also performs some day-to-day admin tasks - monitor for conflict with ORG-05
USR-01	System user group	Operational Users	Uses system for daily transactions.	Can encode/view records allowed by role.	ORG-01	ORG-03 (lead nurse)	MOD-02, MOD-04, MOD-05	Patient bite-case and vaccination records	
USR-02	System user group	System Administrator	Manages users, settings, and support.	Can configure system functions within authorization.	ORG-01	ORG-01	MOD-01, MOD-02, MOD-04, MOD-05	All ABTC-IMS data	Admin has broad system access - segregation-of-duties concern vs. ORG-02 access approval
ORG-03	Organization role/unit	Nursing / Medical Staff (Operational)	Performs bite-case intake, assessment, and vaccine dose administration.	Can create/update bite-case and dose records within assigned role.	ORG-01	ORG-01	MOD-02, MOD-04, MOD-05	Patient bite-case and vaccination records	None identified
ORG-04	Organization role/unit	Data Privacy / Security Role	Oversees handling and protection of patient personal and health data.	Can review access logs and require corrective action.	ORG-01	ORG-05	MOD-02	Patient bite-case records	Shared responsibility with City Health Office Data Privacy Officer
ORG-05	Organization role/unit	Escalation Authority (City Health Officer)	Handles incident escalation, exceptions, and policy decisions above ABTC level.	Approves policy exceptions and incident response.					None identified
USR-03	System user group	Bite-case Patients (data subjects)	Source of intake and exposure data; not direct system users.	No system login; may view own record only if a portal feature is enabled (not yet built).			MOD-02	Patient bite-case records	Not a system user - privacy data subject only

Capstone System Audit Snapshot

Freeze the audited build and list actual modules/functions, users, data, interfaces, environments, and evidence references.

MOD ID	Module / Function	Purpose	Build Status	User Groups / USR IDs	Data Categories	Interface / Dependency	Environment / Hosting	Owner ORG ID	Evidence ID	Protection Assumptions	Notes
MOD-01	Login / Authentication	Allows authorized ABTC staff to securely access the system based on role.	Implemented	USR-01, USR-02	Staff user accounts	None (internal only)	Local/staging demo server	ORG-02	EVD-01	Passwords/tokens are not submitted as evidence.	
MOD-02	Patient / Bite-Case Registration & Records	Stores and manages animal-bite patient intake, exposure history, and case records.	Partial	USR-01	Patient bite-case records (de-identified for submission)	None (internal only)	Local/staging demo server	ORG-01	EVD-02	Use sanitized screenshots and de-identified sample data only; no real patient identifiers.	
MOD-03	Reports / Dashboard	Generates operational and DOH-style summary reports of bite cases and vaccinations.	Planned	USR-01, USR-02	Aggregated case and vaccination data	None (standalone, not yet built)	N/A - not built	ORG-01	N/A	No raw patient identifiers would be included in reports.	Planned feature; must not be represented as implemented.
MOD-04	Vaccination Scheduling & Dose Tracking	Schedules and tracks ARV/RIG doses per patient exposure category.	Implemented	USR-01, USR-02	Dose schedule and administration data	Linked to MOD-02 and MOD-05	Local/staging demo server	ORG-01	EVD-04	No contact information exported beyond de-identified schedule data.	
MOD-05	Vaccine Inventory Management	Tracks anti-rabies vaccine (ARV/RIG) stock levels, lot numbers, and expiry.	Partial	USR-01, USR-02	Vaccine stock/lot data	Linked to MOD-04	Local/staging demo server	ORG-01	EVD-05	No supplier/contract data submitted.	Stock-deduction logic not fully implemented for all scenarios (e. g., wastage, returns).
MOD-06	SMS / Notification Reminder	Would send missed-dose reminder notifications to patients.	Planned	USR-01	Contact number (masked in testing)	Third-party SMS gateway (not yet integrated)	N/A - not built	ORG-01	N/A	Not implemented; no data exposure yet.	Planned feature only; must not be represented as implemented.
MOD-07	Billing / Payment	Would process service fees, if applicable.	Excluded	N/A	N/A	N/A	N/A	N/A	N/A	N/A	Excluded - ABTC provides free/subsidized anti-rabies treatment; no billing function in this system.
MOD-08											

Audit Objectives and Scope Boundaries

Write assessable objectives and clear boundaries. Planned functionality must not be represented as implemented.

OBJ ID	Audit Objective Statement	Risk / Purpose	Criterion / Expected Condition	Intended Result	Related SCP IDs	Related CRT IDs	Related PRC IDs	Related EVD IDs	Notes
OBJ-01	Assess whether user access to the ABTC-IMS is limited to authorized ABTC staff roles (nurse/encoder, administrator) based on approved responsibilities.	Unauthorized access to patient bite-case and vaccination records	Users should have access appropriate to their role (least privilege).	Determine whether the access design supports accountability over patient data.	SCP-01	CRT-01	PRC-01	EVD-01	
OBJ-02	Evaluate whether the implemented and partially implemented modules (login, patient/bite-case records, vaccination scheduling) in the frozen build support	Incomplete or unclear implementation of the patient-care workflow	Implemented functions should match documented requirements and actual build status.	Confirm what functionality can be audited in this increment.	SCP-02	CRT-02	PRC-02	EVD-02	
OBJ-03	Determine whether the partially implemented vaccine-inventory module reasonably supports tracking of ARV/RIG stock to reduce stock-out risk.	Inventory misstatement leading to vaccine stock-outs or missed doses	Recorded stock levels should decrease consistent with doses administered and recorded in the scheduling module.	Assess the reliability of the partial inventory-tracking feature.	SCP-02	CRT-03	PRC-03	EVD-05	
OBJ-04	Ascertain that planned-but-not-implemented features (reporting export, SMS dose reminders) and the excluded billing module are accurately disclosed and excluded from current-period testing.	Planned/excluded functionality misrepresented as implemented, misleading report users	Planned or excluded features must be clearly labeled and excluded from assurance conclusions.	Confirm the scope boundary is correctly documented.	SCP-07	CRT-04	PRC-04	EVD-07	
OBJ-05									

SCP ID	Related OBJ ID	Boundary Dimension	Scope Decision	Specific Area / Item	Reason	Effect on Audit Conclusion	Related MOD / ORG / USR	Limitation or Restriction
SCP-01	OBJ-01	Organization and users	In Scope	ABTC system owner, access approver, nurse/encoder staff, system administrator	Directly connected to system access and accountability for patient bite-case data.	Supports access-control conclusion.	ORG-01, ORG-02, ORG-03, USR-01, USR-02	
SCP-02	OBJ-02	Process and function	In Scope	Implemented and partially implemented modules in the frozen build (login, patient/bite-case records,	Only implemented/partial functions can be tested or inspected.	Prevents planned or excluded features from being treated as working controls.	MOD-01, MOD-02, MOD-04, MOD-05	
SCP-03		Technology and environment	Out of Scope	Production ABTC server, City Health Office network, and the live patient database	Not authorized for Lab 7; production system holds real patient health data.	Technical-vulnerability and production data-integrity conclusions are limited to the demo build.		No scanning, exploitation, disruption, credential use, or system changes.
SCP-04		Data and time	Limitation	Real/unavailable production patient records	Data Privacy Act and partner authorization restrictions on patient health information.	Evidence reliability may be limited to sanitized/demo data.		Use sanitized extracts only.
SCP-05		Procedure	In Scope	Inquiry, inspection, walkthrough, observation, non-destructive testing	Allowed procedures for planning and documentation.	Supports safe audit planning.		
SCP-06	OBJ-01	Organization and users	Out of Scope	Other City Health Office programs and staff not connected to the ABTC (e.g., maternal care, TB-DOTS units)	Outside the boundary of the capstone system.	Excludes unrelated governance conclusions.		
SCP-07	OBJ-02, OBJ-04	Process and function	Out of Scope	Reporting/export module (MOD-03), SMS reminder module (MOD-06), and billing module (MOD-07)	Planned or excluded features are not implemented in the frozen build; billing is not applicable to a free government service.	Excluded from testing and assurance conclusions for this increment.	MOD-03, MOD-06, MOD-07	Must not be represented as implemented.

Criteria, Procedures, and Evidence Request Plan

For each objective, identify the criterion, authorized procedure, evidence needed, source/owner, privacy treatment, reliability concern, and fallback.

OBJ ID	CRT ID	Criterion Source / Section	Expected Condition	Applicability to System	PRC ID	Procedure Type	Authorized Action / Target	Expected Result	EVD ID	Evidence Needed	Source / Owner	Privacy Treatment	Reliability Concern	Fallback / Limitation
OBJ-01	CRT-01	Capstone project's approved user-role / access-design specification for the AVFC-IMS	Staff should receive system access based on role and approver sign-off (least privilege).	Applies to the login module and staff role/permission settings.	PRC-01	Inspection	Inspect a sanitized user-role matrix and a sample access-approval record for AVFC-IMS accounts.	Access design for staff roles can be evaluated.	EVD-01	De-identified user-role matrix, sample access-approval note/screenshot	System owner / access approver (OBJ-01 / OBJ-02)	Sanitized	Screenshots may not capture the full access-change history.	Record as a limitation if the approval record is unavailable.
OBJ-02	CRT-02	Capstone requirements document / design specification for the bite-case intake and	Implemented modules should match the documented bite-case intake and dose-scheduling workflow and declared build	Applies to the frozen build (login, patient/bite-case records, vaccination scheduling) and report	PRC-02	Walkthrough	Perform a controlled walkthrough of the login, patient/bite-case records, and vaccination-scheduling modules using demo data only.	Actual implemented functions supporting the bite-case workflow are documented.	EVD-02	Demo screenshots, module list, build/version notes	Development team / report controller (Member 1)	Redacted	Demo build may not represent the full production deployment.	Disclose as a prototype limitation in the report.
OBJ-03	CRT-03	Capstone inventory design notes / AVFC vaccine stock-recording practice	Recorded vaccine stock should decrease consistent with doses administered and recorded in the scheduling module.	Applies to the partially implemented vaccine-inventory module (MOD-05).	PRC-03	Reperformance	Reperform a small sample of dose-to-stock deductions using demo transactions and compare to the recorded stock balance.	Reliability of the partial inventory-tracking logic can be assessed.	EVD-05	Sample demo transaction log and resulting stock-level screenshot	Development team (Member 3)	Sanitized	Partial implementation may not cover all deduction scenarios (e.g., wastage, refund).	Disclose incomplete deduction logic as a limitation.
OBJ-04	CRT-04	Module-scoping standard - planned/excluded functionality must not be represented as implemented	Planned features (MOD-03, SMS-reminder (MOD-06), and billing (MOD-07) features should be labeled Planned/Excluded and kept out of testing.	Applies to report scope statements and module-status disclosures.	PRC-04	Inquiry	Inquire with the development team and inspect the module-status table for consistency.	Scope boundary for planned/excluded features is confirmed as accurately disclosed.	EVD-07	Module-status table extract, brief written confirmation from development team	Development team / report controller	N/A (no patient data involved)	Self-reported status; not independently testable since features are unbuilt.	Accept as a limitation; re-verify status at the next lab increment.

Decision, Assumption, Limitation, and Restriction Log

Record decisions and limitations that affect the audit scope, evidence, and conclusions.

Log ID	Type	Date	Description	Reason / Basis	Impact on Audit	Owner	Status	Related ID
LOG-01	Decision		Use the actual facility name (Mandaluyong City Animal Bite Treatment Center) as authorized by the partner; confirm with adviser/partner before final submission - substitute an approved pseudonym if authorization is not obtained.	Facility is a public government health service; confirm confidentiality expectations with the ABTC/City Health Office.	Organization identity disclosure depends on partner confirmation.	Member 1	For Review	
LOG-02	Limitation		Production ABTC database and live/real patient records will not be accessed.	Lab 7 authorizes planning and documentation only, unless written authorization states otherwise.	Audit conclusions are limited to sanitized evidence and the demo walkthrough.	Member 3	For Review	
LOG-03	Assumption		Current local/staging demo build (v0.9 prototype) represents the latest capstone prototype as of the Lab 7 freeze.	Group confirmation during Lab 7.	Build changes made after the evidence cutoff must be recorded separately in the build register.	Member 1	In Progress	
LOG-04	Assumption		Vaccine dose schedule follows the DOH-standard intramuscular post-exposure regimen (Days 0, 3, 7, 14/28) unless the group's actual design differs.	Standard rabies PEP schedule used as a placeholder pending confirmation with the partner.	Objective and scope wording assumes this schedule; must be corrected if the actual system differs.	Member 2	For Review	OBJ-01, OBJ-03
LOG-05								
LOG-06								

Cross-Review and HITL AI Validation

Use this sheet to document cross-checks, reviewer challenges, resolutions, privacy checks, and validation of any AI-assisted content.

Review ID	Prepared By	Reviewed By	Section / Record Reviewed	Substantive Challenge or Issue Found	Resolution / Correction Made	AI Used?	AI Purpose	Human Verification Source	Complete?
REV-01	Member 1	Member 2	OBJ and scope wording	Confirm objective and scope wording match the group's actual approved capstone requirements.		Yes	Drafted initial objective and scope wording based on the Lab 7 template requirements.	To be verified by the group against approved capstone requirements and partner confirmation.	No
REV-02	Member 2	Member 3	ORG/USR mapping	Confirm ORG/USR roles match the group's actual capstone team and partner org. chart.		Yes	Drafted initial ORG/USR role mapping for a typical AIEC organizational structure.	To be confirmed with the actual capstone design and partner organization chart.	No
REV-03	Member 3	Member 1	System and evidence entries	Confirm module list, build status, and evidence plan match the actual frozen capstone build.		Yes	Drafted initial module inventory, objectives, and evidence plan based on a typical bike-treatment-center system.	To be verified against the actual frozen capstone build and screenshots.	No
REV-04									
REV-05									

Statement	Group Confirmation
We confirm that each member prepared assigned content and reviewed work produced by another member.	
We confirm that confidential information, passwords, tokens, unrestricted production data, and unnecessary personal records were not included.	
We confirm that AI output, if used, was not treated as audit evidence and was independently verified against authorized sources.	
We confirm that this Excel workbook will be used to prepare the controlled DOCX master report for Lab 7.	

Submission Checklist and Assessment Criteria

Use this sheet before transferring the prepared records into the Professional Audit Report - Increment 1.

No.	Acceptance Test	Status	Evidence / Notes
1	Selected organization, capstone system, build, environment, evidence cutoff, audience, contact, and authorization boundaries are clear.	No	Draft prepared from Lab 7 requirements for a Mandaluyong City ABTC capstone; requires team review, confirmation against the actual capstone build, and partner sign-off.
2	Organization profile and organization chart include only roles/units relevant to system ownership, use, approval, administration, support, privacy/security, and escalation.	No	Draft prepared from Lab 7 requirements for a Mandaluyong City ABTC capstone; requires team review, confirmation against the actual capstone build, and partner sign-off.
3	Every system user group and module has an owner or accountable role; missing or conflicting responsibilities are disclosed.	No	Draft prepared from Lab 7 requirements for a Mandaluyong City ABTC capstone; requires team review, confirmation against the actual capstone build, and partner sign-off.
4	Objectives are assessable, boundaries are explicit, exclusions state their impact, and planned functionality is separated from implemented functionality.	No	Draft prepared from Lab 7 requirements for a Mandaluyong City ABTC capstone; requires team review, confirmation against the actual capstone build, and partner sign-off.
5	Each objective links to applicable criteria, authorized procedures, evidence needs, and limitations using stable IDs.	No	Draft prepared from Lab 7 requirements for a Mandaluyong City ABTC capstone; requires team review, confirmation against the actual capstone build, and partner sign-off.
6	All three members completed assigned work, cross-review, AI validation where applicable, privacy checks, and attestation.	No	Draft prepared from Lab 7 requirements for a Mandaluyong City ABTC capstone; requires team review, confirmation against the actual capstone build, and partner sign-off.
