INFORMATION TECHNOLOGY AUDIT REPORT

Professional Audit Report - Increment 2

Lab 8: Asset Inventory and System Documentation

Audit Team / Group No.	N-VISION Audit Team
Capstone System / Build	N-VISION: A Data-Driven Ticketing System for Optimized Anti-Rabies Vaccination Management | v1.0 | pilot deployment, Mandaluyong City ABTC
Partner Organization	Mandaluyong City Animal Bite Treatment Center (ABTC) / Mandaluyong City Health Office, Mandaluyong City LGU
Member 1 / Role	Edmar A. Isidro | Asset and Configuration Auditor
Member 2 / Role	Celso L. Daclis | Architecture and Data-Flow Auditor
Member 3 / Role	Alvin T. Tinaan | Access and Evidence Auditor
Prior Approved Version	Lab 7 report version 0.1 / [approval date]
Current Version / Date	Version 0.2 | [preparation date] | [submission date]
Audit / Evidence Cutoff	Evidence available through the N-VISION capstone project paper (RevisedFinal3_N-Vision, November 2026) and pilot/UAT records described therein

Master-report instruction
Use these pages to add the Lab 8 increment to the existing professional audit report. Apply prior instructor corrections, update the master version history and build register, preserve approved IDs, and submit the complete updated master unless the instructor directs otherwise.

A. Master Report Update Control

A.1 Version History Entry

Version	Date	Lab / Increment	Prepared By	Reviewed By	Change Summary
0.2	[Date]	Lab 8 / Increment 2	Isidro, Daclis, Tinaan	Isidro, Daclis, Tinaan (cross-reviewed)	Added the N-VISION asset baseline, architecture and data-flow documentation, account/privilege inventory, reconciliation, and evidence index; incorporated prior Lab 7 feedback.

A.2 Final Audit Report Build Register Update

Lab	Report Section	Status	Version / Date	Instructor Action
9	Engagement Profile and Scope	Completed	0.1 / [Lab 7 date]	Approved
10	Asset Inventory and System Documentation	Completed	0.2 / [current date]	Pending
11	Risk and Compliance Assessment	Reserved		Pending
12	Control Assessment and Gap Analysis	Reserved		Pending
13	Audit Findings and Recommendations	Reserved		Pending
14	AI Validation Portfolio and Final Report Integration	Reserved		Pending

A.3 Prior Feedback Closure

Feedback ID	Prior Instructor Comment / Required Revision	Action Taken	Section / IDs Affected	Closed By / Date
FB-08-01	Keep the audit scope limited to the anti-rabies vaccination workflow at the ABTC rather than all City Health Office services.	Confirmed scope to MOD-01 to MOD-06 only; excluded other CHO services and general LGU IT infrastructure.	Scope statement; AST register	Isidro / [date]
FB-08-02	Make trust boundaries between the LGU-managed server and third-party services explicit.	Marked SMS gateway, cloud database provider, and DOH portal as external in Figure 2 and the DEP register.	Figure 2; DEP-04, DEP-05, DEP-07	Daclis / [date]

Feedback ID	Prior Instructor Comment / Required Revision	Action Taken	Section / IDs Affected	Closed By / Date
FB-08-03	Separate documented facts from assumptions about provider-internal controls.	Tagged cloud backup, SMS gateway, and DOH portal internal controls as unverified assumptions/limitations rather than operating controls.	DEP-05, DEP-07; REC-08-02, REC-08-05	Tinaan / [date]
FB-08-04	Do not treat the partial-offline design as an already-tested control.	Retained FLOW-06 as a documented design mitigation only and added a limitation on conflict-resolution testing.	FLOW-06; EVD-08-01	Isidro / [date]

XIII. Asset Inventory and System Documentation

13.1 Asset Inventory

AST ID	Asset / Component	Type	Purpose / Related MOD	Owner / Custodian	Location / Environment	Version / Status	Criticality / Sensitivity	Evidence
AST-01	Web-based front-end client (HTML, CSS, JavaScript)	Software	User interface for registration, queue display, scheduling, and dashboard views / MOD-01, MOD-02, MOD-03, MOD-06	ORG-01 (ABTC) / capstone team custodian	ABTC front-desk and clinic workstations; LGU-managed server (presentation layer)	N-VISION v1.0 / active (pilot)	Medium / Internal	EVD-08-01, EVD-08-04
AST-02	PHP application / business-logic layer	Software/ Service	Implements patient registration, queue, scheduling, inventory, SMS dispatch, and reporting logic / MOD-01 to MOD-06	ORG-01 / capstone team custodian	LGU-managed server (application layer)	N-VISION v1.0 / active (pilot)	High / Confidential	EVD-08-01, EVD-08-02
AST-03	MySQL relational database	Data/Service	Stores patient, schedule, inventory, queue, and log records / MOD-01 to MOD-06	ORG-02 (LGU Health Office) custodian	LGU-managed server (data layer)	Schema v1.0 / active	High / Restricted	EVD-08-02

AST ID	Asset / Component	Type	Purpose / Related MOD	Owner / Custodian	Location / Environment	Version / Status	Criticality / Sensitivity	Evidence
AST-04	Patient registration & bite-incident record store	Data	Patient profile and animal bite case details / MOD-01	ORG-01	MySQL database (local table)	Active	High / Restricted	EVD-08-02, EVD-08-05
AST-05	Vaccination schedule & dose-tracking store	Data	PEP dose schedule, administered doses, follow-up tracking / MOD-03	ORG-01	MySQL database (local table)	Active	High / Restricted	EVD-08-02
AST-06	Vaccine inventory record store	Data	Stock levels, usage, expiration dates, low-stock alerts / MOD-04	ORG-01 (nurse/pharmacy custodian)	MySQL database (local table)	Active	High / Internal	EVD-08-02, EVD-08-03
AST-07	Ticket queue log & real-time display board	Software/ Data	Queue ticket numbers, status, patient-flow display / MOD-02	ORG-01 / capstone team custodian	LGU-managed server; on-premises display	Active	Medium / Internal	EVD-08-01
AST-08	SMS gateway integration (online API, e.g., Semaphore/ Twilio)	Service (external)	Dispatches automated reminder SMS / MOD-05	Third-party SMS provider (ORG-04); capstone team custodian	Cloud / internet-dependent	Active; provider-managed	Medium / Confidential	EVD-08-01, EVD-08-06
AST-09	Reporting dashboard & report archive	Software/ Data	Generates and archives DOH/LGU compliance reports; online submission / MOD-06	ORG-02	LGU-managed server (local) + cloud backup; DOH portal (external)	Active	High / Confidential	EVD-08-02, EVD-08-07

AST ID	Asset / Component	Type	Purpose / Related MOD	Owner / Custodian	Location / Environment	Version / Status	Criticality / Sensitivity	Evidence
AST-10	Cloud database sync/backup service	Service (external)	Online synchronization and backup of local database for continuity during connectivity loss / supports MOD-01 to MOD-06	Cloud hosting provider (ORG-05); capstone team custodian	Cloud	Partial / planned (mitigation for limited connectivity)	High / Restricted	EVD-08-01

13.2 External Services, Interfaces, and Dependencies

ID	Service / Dependency	Provider / Owner	Source -> Destination	Data / Function	Authentication / Protection	Availability / Failure Impact	Evidence
INT-01	SMS gateway (online API, e.g., Semaphore/Twilio)	Third-party SMS aggregator / ORG-04	AST-02 -> INT-01 -> Patient (USR)	Reminder-message request; delivery-status callback	API key; HTTPS	Reminders delayed/fail if gateway or connectivity is down; no automatic voice fallback	EVD-08-01, EVD-08-06
INT-02	Cloud database sync / backup	Cloud hosting provider / ORG-05	AST-03 -> Cloud DB (AST-10)	Patient, schedule, inventory, and log records	Encrypted sync connection; restricted credentials	Backup/restore unavailable during outage; local DB continues to operate offline	EVD-08-01, EVD-08-07
INT-03	DOH online reporting portal	Department of Health / ORG-06 (external)	AST-09 -> DOH portal	Monthly/periodic vaccination and inventory compliance reports	External DOH portal credentials	Report compiled and submitted later if portal is unavailable	EVD-08-07
INT-04	LGU health office reporting channel	Mandaluyong City Health Office / ORG-02	AST-09 -> LGU Health Office	Summary reports; report requests	Internal LGU access; local/email delivery	Low external dependency; local delivery fallback available	EVD-08-02

ID	Service / Dependency	Provider / Owner	Source -> Destination	Data / Function	Authentication / Protection	Availability / Failure Impact	Evidence
INT-05	ABTC staff browser access	ABTC workstations / ORG-01	USR-02..05 -> AST-01	Registration, queue, scheduling, inventory, and reporting interactions	Role-based login (username/password)	Staff cannot use system if server/connectivity is down; manual/paper fallback needed	EVD-08-04, EVD-08-05
INT-06	Patient/public queue-ticket interface	ABTC premises	Patient (USR-01) -> AST-01 / AST-07	Queue ticket number and status (no sensitive data displayed publicly)	None required (public display)	Staff manually call patients if display fails	EVD-08-04
INT-07	Partial-offline local operation mode	Internal application design	AST-01/AST-02 (local) -> AST-03 (local DB) -> sync to AST-10 when restored	Patient registration and ticket generation during connectivity loss	Local session; sync uses same credentials as INT-02	Critical operations continue offline; risk of sync conflicts on reconnect	EVD-08-01

XIV. Architecture, Data Flow, and Trust Boundaries

Figure 2. System Context and Deployment Architecture

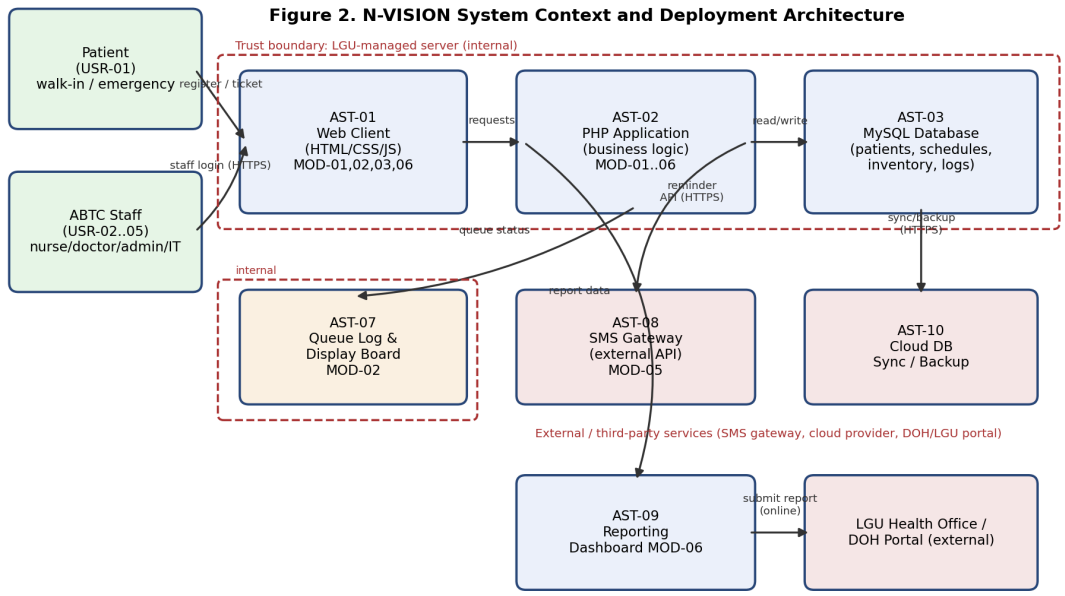

Diagram version 1.0, prepared by Celso L. Daclis, [date], based on N-VISION capstone Chapter 3 (System Architecture, Data Flow Diagrams). Assumption: internal component boundaries follow the paper's three-tier description; SMS gateway, cloud database, and DOH/LGU portal are treated as external per FB-08-02.

14.1 Architecture Node and Connection Register

Node / Link ID	Source / Component	Destination	Direction / Channel	Purpose / Data	Trust Boundary?	Evidence / Assumption
DEP-01	USR-01 Patient	AST-01 Web client	Inbound / on-premises browser	Registration, queue ticket issuance	Yes - patient device to hosted client	EVD-08-04
DEP-02	USR-02..05 ABTC staff	AST-01 Web client	Bidirectional / on-premises browser (HTTPS recommended)	Records, schedules, inventory updates, report review	Yes - staff device to application	EVD-08-04, EVD-08-05
DEP-03	AST-01 / AST-02	AST-03 MySQL database	Bidirectional / local database connection	Patient, schedule, inventory, queue, and log data	No separate boundary - same LGU-managed server	EVD-08-02

Node / Link ID	Source / Component	Destination	Direction / Channel	Purpose / Data	Trust Boundary?	Evidence / Assumption
DEP-04	AST-02 Application	AST-08 SMS gateway	Outbound / internet API (HTTPS)	Reminder request; delivery-status response	Yes - internal application to external online provider	EVD-08-01; assumption: gateway credentials not evidenced
DEP-05	AST-03 Local database	AST-10 Cloud database	Outbound-bidirectional / internet sync-backup connection	Sync and restore of records	Yes - local LGU server to external cloud provider	EVD-08-01; limitation: provider-side controls not evidenced
DEP-06	AST-09 Reporting dashboard	LGU Health Office (ORG-02)	Outbound / local or email delivery	Summary compliance reports; report requests	No separate boundary - internal government units	EVD-08-02
DEP-07	AST-09 Reporting dashboard	DOH portal (external)	Outbound / internet online submission	Monthly DOH compliance report; report request	Yes - LGU system to external national government portal	EVD-08-07; limitation: DOH portal controls not evidenced

Figure 3. Key Data-Flow Diagram

Figure 3. N-VISION Key Data-Flow Diagram

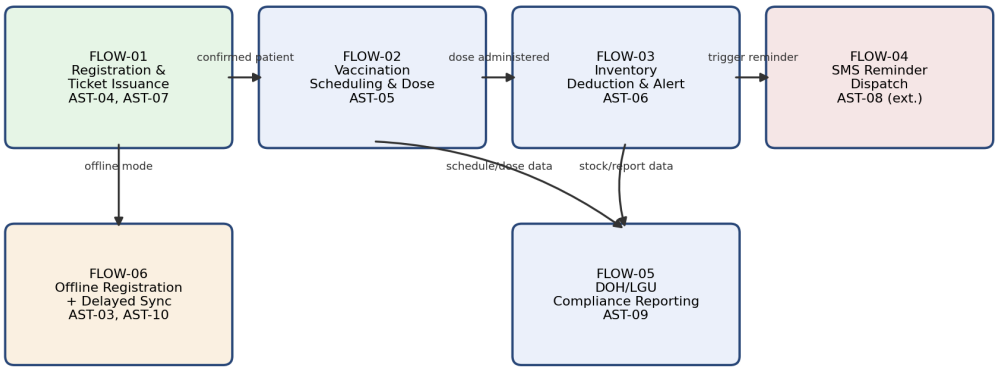

Diagram version 1.0, prepared by Celso L. Daclis, [date], based on N-VISION capstone Chapter 3 (Level 1/2 Data Flow Diagrams, Table 3.1 Sprint Plan). Shows the six selected data journeys (FLOW-01 to FLOW-06) covering registration, scheduling, inventory, SMS reminders, reporting, and offline operation.

14.2 Data-Flow Register

FLOW ID	Transaction / Journey	Actor / Source	Validation / Processing	Store / Destination	Transmission / Protection	Retention / Disposal	Related IDs
FLOW-01	Patient registration & ticket issuance	USR-01 Patient / ABTC front-desk staff	Input validation (required fields, bite-incident details), duplicate-patient search	AST-04 patient record store; AST-07 queue log	Local session; role-based access	Retained per clinic record-retention policy (not independently evidenced)	MOD-01, MOD-02; AST-01, AST-04, AST-07; EVD-08-04
FLOW-02	Vaccination scheduling & dose administration (PEP protocol)	USR-02/USR-03 nurse or doctor	PEP dose-schedule computation, slot-availability check, dose recording	AST-05 vaccination schedule store	Local session; role-based access; triggers FLOW-03 and FLOW-04	Retained for continuity of care; disposal period not evidenced	MOD-03; AST-03, AST-05; EVD-08-02

FLOW ID	Transaction / Journey	Actor / Source	Validation / Processing	Store / Destination	Transmission / Protection	Retention / Disposal	Related IDs
FLOW-03	Vaccine inventory deduction & low-stock alerting	AST-02 application (triggered on dose administration)	Stock-level check, automatic deduction, threshold comparison	AST-06 inventory record store	Internal database write; alert routed to ABTC staff	Retained as current stock ledger; historical log retention not evidenced	MOD-04; AST-02, AST-06; EVD-08-02, EVD-08-03
FLOW-04	Automated SMS reminder dispatch	AST-02 application (scheduled appointment trigger)	Compose reminder message; dispatch via SMS gateway API; log delivery status	AST-08 SMS gateway (external); notification record store	HTTPS/API request to third-party gateway; delivery status logged locally	Notification logs retained locally; synced to cloud DB when available	MOD-05; AST-02, AST-08; EVD-08-01, EVD-08-06
FLOW-05	DOH/LGU compliance reporting	AST-02/AST-09 reporting engine (ABTC admin request)	Query patient, schedule, and inventory data; compile formatted report	AST-09 report archive (local + cloud backup)	Local report to LGU Health Office; online submission to DOH portal	Report archive retained locally and backed up to cloud; DOH portal retention not evidenced	MOD-06; AST-03, AST-09; EVD-08-02, EVD-08-07
FLOW-06	Offline registration/ticketing with delayed synchronization	USR-02..05 ABTC staff during connectivity loss	Local validation and ticket generation continue offline; queued for sync	AST-04 patient record store (local); AST-10 cloud database (sync target)	Local operation during outage; encrypted sync connection restores link to cloud DB	Data held locally until connectivity restored; conflict-resolution behavior not independently tested	MOD-01, MOD-02; AST-01, AST-03, AST-10; EVD-08-01 (limitation)

XV. Account, Privilege, and Documentation Reconciliation

15.1 Account and Privilege Inventory

ACC ID	Account Type / Role	Related USR / ORG	Authentication	Privilege / Access	Provision / Approval	Review / Deactivate	Logging	Evidence / Concern
ACC-01	Nurse (clinical user)	USR-03 / ORG-01	Named account; username/password login	Register patients, record administered doses, view schedules and inventory alerts / MOD-01, MOD-03, MOD-04	Provisioned by ABTC admin on hiring; approved by clinic head	Deactivated on staff exit; periodic review not evidenced	Login and clinical-action events logged	EVD-08-04, EVD-08-05; review cadence not documented
ACC-02	Doctor (clinical user)	USR-04 / ORG-01	Named account; username/password login	Assess bite cases, administer doses, view/edit schedules, view reports / MOD-01, MOD-03, MOD-06	Provisioned by ABTC admin; approved by clinic head	Deactivated on exit; review not evidenced	Clinical and reporting actions logged	EVD-08-04, EVD-08-05
ACC-03	Administrative staff / encoder (non-clinical)	USR-05 / ORG-01	Named account; username/password login	Patient registration data entry, queue management, generate LGU/DOH reports / MOD-01, MOD-02, MOD-06	Provisioned by ABTC admin	Deactivated on exit; review not evidenced	Registration and report-generation events logged	EVD-08-04, EVD-08-05
ACC-04	IT support staff / system administrator	USR-06 / capstone team (ORG-03)	Privileged named account	Manage user accounts, roles, system configuration, database maintenance, deployment	System owner / capstone-team approval	Privileged review and prompt deactivation recommended; not yet evidenced as operating	Administrative changes logged (extent not fully verified)	EVD-08-01; segregation-of-duties evidence limited

ACC ID	Account Type / Role	Related USR / ORG	Authentication	Privilege / Access	Provision / Approval	Review / Deactivate	Logging	Evidence / Concern
ACC-05	Application/service account (PHP to database)	AST-02 / capstone team (ORG-03)	Managed database credential (connection string)	Application-level MySQL read/write on patient, schedule, inventory, queue, and log tables	Provisioned during deployment configuration	Rotation/disable-on-compromise not evidenced	Database-level logging not fully available	EVD-08-02; credential-rotation practice not evidenced
ACC-06	SMS gateway service identity (API key)	AST-08 / ORG-04 (external provider)	API key / token	Send SMS requests; receive delivery-status callbacks	Provisioned by capstone team during integration setup	Rotation/revocation process not evidenced	Provider-side delivery logs; local notification log	EVD-08-01, EVD-08-06; key-rotation/audit trail not evidenced
ACC-07	Cloud database sync account	AST-03/AST-10 / ORG-05 (external provider)	Managed sync credential	Backup/restore and synchronization of local database to cloud	Provisioned during deployment configuration	Rotation/disable practice not evidenced	Sync logs available at provider level only	EVD-08-07; provider-side controls not independently verified
ACC-08	DOH portal submission account	AST-09 / ORG-06 (external government agency)	External government-portal credential	Submit monthly compliance reports to DOH	Provisioned/approved by DOH (external process)	Review/deactivation controlled externally; not evidenced	Portal-side audit trail not available to auditors	EVD-08-07; account fully outside capstone team's control

15.2 Inventory and Diagram Reconciliation

Check ID	Expected Population / Relationship	Source Compared	Result	Missing / Unmatched Item	Resolution / Limitation
REC-08-01	All six approved MOD records map to assets	Lab 7 MOD register vs. AST register	Complete	None	Each module (MOD-01 to MOD-06) is supported by at least one asset (AST-01 to AST-10).

Check ID	Expected Population / Relationship	Source Compared	Result	Missing / Unmatched Item	Resolution / Limitation
REC-08-02	All external interfaces/dependencies map to a DEP or INT link	INT register vs. DEP register	Exception	Provider-internal controls for SMS gateway and cloud database provider	Recorded as limitation (LIM-01); request provider evidence in the next increment.
REC-08-03	User roles map to account types	Respondent/user-role profile (paper Table 3.3) vs. ACC register	Complete	None	Nurses, doctors, administrative staff, and IT support staff each map to a documented ACC ID.
REC-08-04	Data flows show input, validation, storage, transmission, retention/disposal	FLOW register vs. system description (Chapter 3)	Exception	Formal retention/disposal periods not documented in the capstone paper	Flagged as limitation (LIM-02); recommend a formal records-retention policy.
REC-08-05	Architecture diagram nodes reconcile with asset inventory	Figure 2 / DFD (Chapter 3) vs. AST register	Complete	None	All context-diagram entities (patient, staff, SMS gateway, LGU, DOH, cloud DB) map to AST/ORG/USR IDs.
REC-08-06	Offline/partial-connectivity design remains within approved Lab 7 scope	Challenges and Solutions (Chapter 3) vs. scope statement	Complete	None	Offline functionality is documented as a designed mitigation, not treated as an already-tested control.

15.3 Evidence Index Additions

EVD ID	Evidence Title / Description	Source / Owner	Date / Version	Related IDs	Privacy Treatment	Reliability / Limitation
EVD-08-01	N-VISION system architecture and context/data-flow diagrams (Figures 2-3; Level 0/1/2 DFDs)	Capstone research team / MCST	Chapter 3, N-VISION v1.0	AST-01 to AST-10; DEP-01 to DEP-07; INT-01 to INT-07	No real credentials, patient identifiers, or production data shown (design-stage diagrams)	Available; design-stage document, not yet independently verified against live deployment

EVD ID	Evidence Title / Description	Source / Owner	Date / Version	Related IDs	Privacy Treatment	Reliability / Limitation
EVD-08-02	System architecture and database description (three-tier architecture, MySQL schema)	Capstone paper, Chapter 3 'System Architecture'	N-VISION v1.0	AST-03 to AST-07, AST-09; DEP-03	Schema-level description only; no patient records extracted	Available; narrative description, not a raw schema export
EVD-08-03	Vaccine inventory monitoring module description	Capstone paper, Chapter 3	N-VISION v1.0	AST-06; FLOW-03	No real stock/patient data; feature description only	Available; functional description only, not tested inventory data
EVD-08-04	User Acceptance Testing (UAT) instrument and respondent profile	Capstone paper, Appendix A / Table 3.3	N-VISION v1.0, 8 respondents	AST-01, AST-04, AST-07; ACC-01 to ACC-03; DEP-01, DEP-02	Respondent names not disclosed in paper; roles only	Available; self-developed instrument, 8-respondent sample (small, non-generalizable)
EVD-08-05	ISO/IEC 25010 evaluation instrument (security, reliability, usability items)	Capstone paper, Appendix B	N-VISION v1.0	AST-01, AST-02; ACC-01 to ACC-03; INT-05	No credentials or patient data; survey instrument only	Available; self-reported evaluation, not independent penetration testing
EVD-08-06	SMS reminder/notification module description (Sprint 4 deliverables)	Capstone paper, Table 3.1 Sprint Plan	N-VISION v1.0	AST-08; FLOW-04; DEP-04	No real phone numbers or message content shown	Available; sprint-plan description only, not a tested delivery log

EVD ID	Evidence Title / Description	Source / Owner	Date / Version	Related IDs	Privacy Treatment	Reliability / Limitation
EVD-08-07	Deployment, integration, and reporting description (LGU-managed server, DOH/LGU reporting)	Capstone paper, 'Integration and Deployment'	N-VISION v1.0	AST-09, AST-10; DEP-05, DEP-07; ACC-07, ACC-08	No provider credentials or portal access details shown	Partially available; provider-side and DOH portal controls not independently evidenced (limitation)

XVI. Lab 8 Completion Checklist

Check	Completion Requirement
Yes	All in-scope modules, environments, interfaces, data categories, and user roles map to assets.
Yes	Every diagram node and connection has an ID, source, direction, purpose, and evidence or stated assumption.
Yes, with limitation (see REC-08-04)	Critical data flows show collection/input, validation, processing, storage, transmission, output, retention, disposal, and protection points as applicable.
Yes	User, privileged, service, database, and integration account types are documented without exposing secrets.
Yes, with limitation (see REC-08-02, REC-08-05)	Asset, architecture, data-flow, account, and evidence records reconcile with the approved Lab 7 scope.
In progress - pending member signatures (Z.3)	Version history, build register, feedback closure, cross-review, AI validation, and attestation are complete.

Z. Collaboration, AI Validation, and Instructor Review

Z.1 Cross-Member Challenge Record

Review ID	Prepared By	Reviewed By	Item / Section	Challenge or Check	Resolution / Evidence
REV-08-01	Isidro	Daclis	AST-08 / DEP-04 (SMS gateway)	Is the SMS gateway an internal module or an external dependency?	Reclassified as external service (INT-01/AST-08) rather than an internal N-VISION component; added evidence limitation for provider-side controls.
REV-08-02	Daclis	Tinaan	ACC-04 / ACC-05, ACC-07 (IT support vs. service accounts)	Are administrator and application/database service privileges being reviewed separately?	Split into distinct ACC-04 (human IT support/admin) and ACC-05/ACC-07 (service/application accounts); flagged missing segregation-of-duties evidence.
REV-08-03	Tinaan	Isidro	FLOW-06 (offline/delayed sync)	Is offline functionality being treated as an already-tested control?	Retained as a documented design mitigation only; added a limitation noting that conflict-resolution behavior on reconnect has not been independently tested.

Z.2 Human-in-the-Loop AI Validation Log

AI ID	Tool / Purpose	Material Suggestion	Evidence / Criteria Checked	Decision	Correction / Rationale	Privacy Check
AI-08-01	AI assistant / organize asset-inventory drafting	Suggested treating the SMS gateway as an internal N-VISION module	Lab 7 MOD register; Chapter 3 system description	Reject	Reclassified as external interface/dependency (INT-01/AST-08) since it is a third-party API	No patient data entered; capstone paper text only
AI-08-02	AI assistant / draft architecture and data-flow wording	Suggested assuming a dedicated object-storage provider for uploaded documents	Chapter 3 'System Design and Development'; DFD description	Reject	Removed; N-VISION only describes a MySQL database and cloud sync/backup, not separate object storage	No sensitive data entered

AI ID	Tool / Purpose	Material Suggestion	Evidence / Criteria Checked	Decision	Correction / Rationale	Privacy Check
AI-08-03	AI assistant / check reconciliation completeness	Suggested marking DOH portal and cloud-provider controls as 'effective' based on the capstone description alone	Chapter 3 deployment/integration narrative; evidence availability	Reject	Marked as limitation/exception instead (REC-08-02, REC-08-05) since provider- and portal-side controls are not independently evidenced	No credentials or portal data entered
AI-08-04	AI assistant / propose stable IDs for assets, flows, accounts	Proposed consistent AST/MOD/DEP/FLOW/ACC/EVD numbering aligned to the six N-VISION modules	Capstone paper module list; Table 3.1 Sprint Plan	Accept	Accepted after human review; IDs cross-checked for consistency across all sections	No raw patient or credential data entered

Z.3 Group Attestation

We certify that the Lab 8 work reflects the identified capstone build and authorized evidence. We completed the assigned work and cross-review, protected confidential information, did not treat AI output as audit evidence, and disclosed material limitations.
